EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with attorney of record John May on April 11, 2006.

The application has been amended as follows:

Delete "(0096)" on line 13 of claim 1.

2. The following is an examiner's statement of reasons for allowance: the claims are considered to be allowable due to the inclusion of claim limitations: "an auto-compensate capacitor responsive to the amplified and filtered low frequency signal component output by the second operational amplifier for providing a compensated detection signal with increased sensitivity to transient signals representative of a waving hand in proximity to the antenna" in claim 1; "means responsive to the detection signal for generating an output signal when the detection signal is representative of a waving hand in proximity to the antenna" in claim 8; and "compensating for slow environmental changes in the amplified and filtered detection signal component to thereby provide a compensated detection signal with increased sensitivity to transient signals representative of a waving hand in proximity to the antenna" in claims 12 and 20.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue
